## PROFESSIONAL EXPERIENCE

**BBR - Consultant;** Indigo Cowork Space, Nairobi(Kenya)  
**(Big Bold Red Ad Agency)**

*August 2025 – April 2026*

- Frontend Engineering for a novel lead generation streaming platform project in collaboration with Safaricom - *Vybestreamz*
  - Co-developer using Next JS as the main framework to write the code in Typescript language. All 20+ components and subsequent integrations were mostly constructed and debugged with Claude Code as a proxy; it was able to reduce development time by 80%. Approved designs were instantiated in the first phase through static builds before proceeding to testing.
- Lead Software Tester in the Software Development Life Cycle of the streaming platform
  - Writing over 50 unit tests for the static build's(Vybestreamz) components to ensure UI elements are rendered seamlessly. Improvements were made to the static components that failed the tests which reduced loading time by 25%. Oversaw that the coverage of components tested adhered to the 85% mark.
  - Writing 20+ integration tests for the frontend-API integration which lead to the refactoring of code and as a consequence, speed of data retrieval was increased by 15%.
  - Involved in the writing and performance of integration tests for one of Safaricom's main entertainment streaming platforms – *Baze*. Ensured that the coverage surpassed the 90% mark and failed tests were addressed as emphasized by Safaricom's internal guidelines.
  - Oversaw the 1<sup>st</sup> round of the full day deployment of Vybestreamz streaming platform and was on standby for any software related issues.
- Research and Full Stack Development of Sentiment Analysis Artificial Intelligence system
  - Conducted research on ethical scraping of data from social media platforms i.e. TikTok, Instagram, Facebook, X and LinkedIn. All this was done for the sole purpose of effective marketing with aim of reducing market research cost, through automation, by up to 80%.
  - Development of the Minimum Viable Product (MVP) using n8n as the main workflow automation tool to validate the viability of a Sentiment Analysis tool at a small scale. This reduced the time used in the preparation of weekly marketing campaign reports by up to 35%.
  - Development of production ready code using Python as the primary language for the creation of in-house scrapers for commercial use. Different techniques used to bypass Chrome's innate fingerprinting of browser sessions and Meta's application layer security implementations to retrieve data effectively. This reduced the cost of scraping by 80% since Apify store scrapers were no longer used.

**KeNHA - Attache;** Barabara plaza, Nairobi(Kenya)  
**(Kenya National Highways Authority)**

*August 2022 – September 2022*

- Structural Investigation and reporting for the main authority on road construction

- Conducted structural investigations on 5 footbridges along Lang'ata Road, designed by Spanish Contractor CENTUNION Industries identifying critical stress points and reducing potential safety risks by 20%.
- Prepared detailed reports that contributed to a 15% improvement in safety compliance for the investigated structures.

**KeNHA - Attache;** Barabara plaza, Nairobi(Kenya)  
**(Kenya National Highways Authority)**

*May 2023 – September 2023*

- Geometric design lead, structural oversight and design review coupled with infrastructure-project representation
  - Oversaw the instantiation of 2 footbridges and reviewed designs of 4 additional pertinent projects identifying pockets of improvement leading to refactoring of calculations reducing material costs by up to 10%.
  - Represented the structures department at the Mombasa Trade Fair, engaging over 500 attendees to enhance public awareness, generating 50+ stakeholder connections increasing tender participation by 25%.

## EDUCATION

**Strathmore University, School of Business and Information Technology |**  
**Diploma in Business and Information Technology |** Nairobi

*2019 – 2025*

Concentrations: Data structures, Information Systems and Web development | GPA: 3.5/4.0

- I developed 2 web applications using React, Express JS, Node JS and MongoDB, optimizing data retrieval processes by implementing JavaScript indexing and caching techniques, which reduced query response times by 30%

**University of Nairobi, School of Architecture & Engineering |**  
**Bachelor of Science in Civil Engineering |** Nairobi

*2019-2024*

Concentrations: Road design and maintenance; Minor in structural design | GPA: 3.0/4.0

- As an active member of the Engineering Students Association (ESA), I participated in organizing technical workshops, such as a 3-day AutoCAD training session attended by 50+ students

## VOLUNTEER EXPERIENCE

**The Nairobi Hospital – Volunteer;** Argwings Kodhek Road, Nairobi (Kenya)

*August 2016*

- Managed patient data for over 100 records, ensuring accuracy and confidentiality.
  - Improved patient satisfaction scores by 10% through effective communication and support in dietary and sanitary needs.

**Thomas Barnados Children's Home – Volunteer;** Lang'ata Road, Nairobi (Kenya)

*August 2015*

- Assisted with daily operations, including drying and folding laundry for the facility.
  - Provided care and support for 10+ infants, contributing to their well-being and development.

## SKILLS/INTERESTS

- Proficient with Civil 3D, Tekla Structures, Revit, Microsoft Excel, HTML, CSS, JavaScript, React, Express JS, MongoDB and Node JS.
- Interested in additional concepts in GSAP (GreenSock Animation Platform), Visual Studio Code and Jupyter.
- Avid reader of personal development literature, applying insights to enhance understanding of existential principles and interpersonal skills.
- Software programming involving web application design using emergent technologies like Artificial Intelligence through AI APIs i.e. Anthropic API
- Exploring and learning music-Guitar
- Passionate about fitness, achieving a 50% increase in strength and 30% increase in mass through a structured bodybuilding program
- Instagram content creation (fitness-related), growing a following of 1000+ engaged users.
